

Detection Technologies Announces New Client Additions for 2nd Quarter 2005

JULY 08, 2005

Calgary, Alberta and Lynchburg, Virginia

Detection Technologies announced today the addition of several new clients during the 2nd Quarter of 2005 as it continues to expand the use of its “Enalysis” compressor optimization and fleet management program throughout the North American natural gas industry. New client additions over the past 3 months include:

- **Blue Mountain Energy**, a full cycle exploration and development company, primarily focused on exploring for natural gas in the Peace River Arch and west-central Alberta.
- **CNX Gas Company**, a Virginia-based exploration & production company and wholly-owned subsidiary of CONSOL Energy. CNX Gas is the second largest gas producer in the Appalachian Basin with over 1.1 TCF of net proved gas reserves.
- **Great Lakes Energy Partners**, an independent oil and gas company engaged in development, exploration, and acquisition of properties in the Appalachian Basin. Great Lakes is a wholly-owned subsidiary of Fort Worth-based Range Resources Corporation.
- **MidCon Compression**, the natural gas compression subsidiary of Chesapeake Energy Corporation. Oklahoma City-based Chesapeake is the third largest independent gas producer in the United States, with estimated proven reserves of 5.4 TCF of natural gas equivalent.
- **Morpheus Energy**, a private oil and gas corporation, headquartered in Calgary with interests in producing oil and natural gas properties throughout Alberta.
- **Progress Energy Trust**, a natural gas weighted exploration and production trust with operations focused in northeast British Columbia and northwest Alberta.
- **Response Energy**, a private oil and gas corporation, headquartered in Calgary with interests in producing oil and natural gas properties throughout Alberta.
- **Shiningbank Energy**, a conventional oil and gas royalty trust that purchases, develops, and operates producing properties in west-central Alberta.
- **TKE Energy**, a sustainable energy trust formed through the reorganization of TUSK Energy Inc. TKE Energy is active in the Western Canadian Sedimentary Basin.

During the 2nd Quarter of 2005, several of Detection's existing clients also expanded their use of the Enalysis Program on additional compressors located in Colorado, Kentucky, Oklahoma, Texas, Virginia, British Columbia, and Alberta.

Detection Technologies is the developer of "Enalysis", the world's leading compressor optimization and fleet management program. For more information on Detection, please call 800-780-9798, or visit our website at www.detection.com.
