

Detection Announces New Client Additions, Relocation of Houston Office

JULY 31, 2006

Calgary, Alberta and Lynchburg, Virginia

Detection Technologies announced today the addition of several new key clients during the 2nd Quarter of 2006 as it continues to expand the use of its “Enalysis” compressor optimization and fleet management program throughout the North American natural gas industry. New client additions over the past 3 months include:

- **Apache Corporation**, one of the largest independent oil and gas exploration and development companies with operations around the globe and total assets of \$20 Billion.
- **Daylight Energy Trust**, a natural-gas weighted energy producer focused in the high potential areas of West Central Alberta and the Peace River Arch. Daylight was formed through Midnight Oil & Gas Ltd’s acquisition of Vintage Petroleum Canada.
- **Esprit Energy Trust**, a Calgary-based natural gas weighted income trust. Esprit’s operations are geographically concentrated in Alberta and are characterized by long-life, gas-focused assets. Esprit currently has a market capitalization of approximately \$800 Million.

During the 2nd Quarter of 2006, several of Detection’s existing clients also expanded their use of the Enalysis Program on additional compressors located in Louisiana, Oklahoma, Pennsylvania, Texas, Virginia, Alberta, British Columbia, and Saskatchewan.

“Detection continues to set itself apart as a driving force shaping the way natural gas producers, gatherers, and transmission companies think about and manage their compressor fleets” said Cavan Carlton, Detection’s U.S. & International General Manager. “With gas prices and rental rates as high as they are, maximizing compressor efficiencies and throughput are both critically important. Our clients are determined to get everything out of their compressors they possibly can, and we are helping them to do just that.”

In order to better serve its US clients, Detection also announced today that it has relocated its Houston office to the Greenway Plaza area. The new office address is 8 Greenway Plaza, Suite 1105, Houston, TX 77046 (Telephone - 713.357.4775). All current and prospective clients are encouraged to call or drop by.

Detection Technologies is the developer of “Enalysis”, the world’s leading compressor optimization and fleet management program. For more information on Detection, please call 800.780.9798, or visit their website at www.detection.com.
