

# Detection Announces Senior Management Changes, Creation of Special Services Division and New Client Additions

JANUARY 3, 2007

Calgary, Alberta and Forest, Virginia

Detection Technologies announced today the addition of several new key clients during the 3<sup>rd</sup> and 4<sup>th</sup> Quarters of 2006 as it continues to expand the use of its “Analysis” compressor optimization and fleet management program throughout the North American natural gas industry. New client additions over the past 6 months include:

- **Dominion Exploration & Production**, one of North America’s largest independent oil and gas exploration and development companies. Dominion has approximately 6 TCFE of proved natural gas reserves, 7800 miles of natural gas pipeline, and the largest natural gas storage system in the United States. Dominion has onshore and offshore reserves in major North American basins, including West Texas, Appalachian Basin, Michigan Basin, Mid-Continent, Rocky Mountains, Gulf Coast, Western Canada, and the offshore Gulf of Mexico.
- **Toromont Energy Systems**, a company engaged in the design, manufacture, and service of modular systems and components in the natural gas, process gas, chemical, and petro-chemical process industries worldwide. Toromont supplies compressor packages to end users on both rental and rent-to-purchase plans, and has strong packaging relationships with Ariel, Gemini, Frick, Caterpillar, and Waukesha.
- **West Energy**, a public energy exploration company operating in Western Canada. West Energy is traded on the Toronto Stock Exchange under the symbol “WTL”.

During the 2<sup>nd</sup> half of 2006, several of Detection’s existing clients also expanded their use of the Analysis Program on additional compressors located in Arkansas, Colorado, Kentucky, Louisiana, Mississippi, New Mexico, Oklahoma, Pennsylvania, Texas, West Virginia, Virginia, Alberta, British Columbia, and the Northwest Territories.

Detection also formally announced today the creation of its new Special Services Division, to be headed by Jeffrey Essel-Ampah, Vice President of Special Services. “I am pleased to have been given the opportunity to lead this team within Detection. Our clear mission in the Special Services Division is to assist our clients in resolving troublesome compressor performance issues while generating quantifiable financial results to their bottom line.” More information on Detection’s new Special Services Division is contained on the company’s website, or can be obtained by contacting Detection at 1.800.780.9798.

Detection has also announced that effective January 1, 2007, Brian E. Taylor has assumed the role of President and Chief Operating Officer. Brian has been a key leader at Detection since 1999, most recently serving as Senior Vice President & COO. Alan Taylor will continue to serve as Chairman and CEO of Detection. Both men are based in Calgary, Alberta. “There are great things lying ahead for

Detection, and to better address our future commitments and endeavors we are taking this opportunity to put into place a brilliant management team led by Brian Taylor. This will facilitate our continued rapid growth both domestically and internationally while maintaining our prime focus of superior customer service” said Alan Taylor.

Detection Technologies is the developer of “Enalysis”, the world’s leading compressor optimization and fleet management program. For more information on Detection, please call 800.780.9798, or visit their website at [www.detection.com](http://www.detection.com) .
