

## **Detection Technologies Announces Achievement of Significant Regional Milestone - 350 Compressors Now Under Contract in the Appalachian Basin**

AUGUST 31, 2007

Calgary, Alberta and Forest, Virginia

Detection Technologies announced today that it has successfully added the 350<sup>th</sup> compressor located in the Appalachian Basin to its compressor optimization and fleet management program. The 350<sup>th</sup> compressor, located in central West Virginia, was a 105 horsepower Ajax.

“The Appalachian Basin has been a major focus area for us over the past five years,” said Cavan Carlton, Detection’s Senior Vice President & General Manager. “From our office in Forest, Virginia we have built very strong relationships with nearly all of the major natural gas producers operating in the basin. Appalachia is an exciting place to be right now in the natural gas business.”

Detection’s Appalachian Basin clients include:

- Chesapeake Energy
- Dominion Exploration & Production
- East Resources
- Equitable Resources
- Great Lakes Energy Partners
- Kentucky West Virginia Gas Company
- Nora Gathering LLC
- Pennsylvania General Energy
- Penn Virginia Oil & Gas
- Petroleum Development Corporation
- Pine Mountain Oil & Gas; and
- Range Resources

“Our business model is simple” said Carlton. “We help our clients get increased production, higher run times, and minimized fuel usage on their compression assets – whether they lease them or own them. By applying Detection’s compressor optimization technology, our clients have realized substantial cash flow gains – and that has translated into continued growth for us as company.”

Detection Technologies is the developer of “Enalysis”, the world’s leading compressor optimization and fleet management program. For more information on Detection, please call 800.780.9798, or visit their website at [www.detection.com](http://www.detection.com).
