

Santos, Ltd Selects Detection Technologies for Onshore Compressor Optimization & Fleet Management Services

OCTOBER 22, 2007

Calgary, Alberta and Forest, Virginia

Detection Technologies announced today the finalization of a contract with Santos, Ltd. to provide compressor optimization and fleet management services for the majority of Santos' onshore Australian compressor fleet.

Santos, Ltd. is a major Australian oil and gas exploration and production company headquartered in Adelaide, South Australia. With assets of nearly \$7 Billion and annual production of 61 MMBOE, Santos is Australia's largest domestic gas producer. Santos provides gas sales to all mainland Australian states and territories, ethane to Sydney, and oil and liquids to domestic and international customers. The company is also active in Indonesia, Papua New Guinea, Vietnam, India, Kyrgyzstan and Egypt.

Santos recently initiated an industry-wide search for a compressor optimization tool to apply to its large fleet of reciprocating compressors. After an in-depth and extensive review period, Detection Technologies' "Analysis" program was selected as the preferred application. Detection and Santos anticipate complete implementation of the compressor optimization and fleet management application within 60 days.

"We are very pleased to have been selected by Santos", stated Cavan Carlton, Detection's Senior Vice President & General Manager. "This contract clearly demonstrates the worldwide scalability of our technology. We now have clients utilizing the Analysis program on compressors located in North America, South America, Africa, and Australia. Any producer, no matter where they are located, can realize significant and immediate operational and production benefits from applying our technology."

Detection Technologies is the developer of Analysis, the world's leading compressor optimization and fleet management program. For more information on Detection, please call 800.780.9798, or visit their website at www.detection.com.
