

Detection Announces New Client Additions for 1st Quarter 2008

April 4, 2008
Calgary, Alberta and Forest, Virginia

Detection Technologies announced today the signing of five important client contracts in Canada and the United States during the first quarter of 2008. The newest clients to have engaged Detection Technologies to provide compressor optimization and fleet management services include:

- **Spectra Midstream** - one of the largest independent midstream operators in the Western Canadian Sedimentary Basin with interests in 13 natural gas processing plants and 59 production facilities. Spectra Midstream operates over 1000 miles of gathering pipelines and has over 50 years of sour gas processing experience in western Canada.
- **Murphy Oil Corporation** - a worldwide oil and gas exploration and production company with refining and marketing operations in the US and UK and crude oil and natural gas exploration and production operations in Canada.
- **Petrobank Energy and Resources Ltd** - a Calgary-based oil and gas exploration and production company with operations in western Canada and Colombia. The Company operates high-impact projects through four business units.
- **Elkhorn Energy** - a Tulsa, Oklahoma based midstream company operating several gas processing plants in the United States.
- **Corinthian Energy Corp** - a private Canadian company based in Calgary, Alberta. Corinthian is active in the exploration, development, and production of oil and gas assets located in western Canada.

“These new clients speak well to the versatility and scalability of the Enalysis solution”, stated Brian Taylor, Detection’s President and Chief Operating Officer. “They represent a good variety of different company profiles - large and small, public and private, gas producers as well as pure midstream companies.”

“Detection continues to grow very rapidly, both through the consistent signing of new contracts such as these, in addition to the significant organic growth within our current client portfolio. It is this kind of dynamic growth year over year that has enabled Detection to remain clearly focused on returning outstanding client value and for us to make large scale reinvestments in both our technical solutions and client service offerings. The result is that Detection continues to remain at the forefront of the compressor optimization and fleet management industry.”

Detection Technologies is the developer of “Enalysis”, the world’s leading compressor optimization and fleet management solution. For more information on Detection Technologies, please call 800.780.9798, or visit their website at www.detection.com.
