

## Detection Announces New Clients for 3<sup>rd</sup> Quarter 2008

OCTOBER 13, 2008

Calgary, Alberta and Forest, Virginia

Detection Technologies announced today the addition of several new key clients during the third quarter of 2008 as it continues to expand the use of its “Analysis” compressor optimization and fleet management program throughout the natural gas industry. New client additions over the past 3 months include:

- **Crosstex Energy**, a leading independent midstream energy services company headquartered in Dallas, Texas. Crosstex was formed in 1996, and currently operates over 5,000 miles of pipeline, 160 gas treating plants, 12 gas processing plants, and 4 fractionation facilities.
- **Central Global Resources**, an affiliate of privately held, Denver-based Central Resources, Inc. Central Global is active in the Western Canadian Sedimentary Basin.
- **MEC Operating**, a division of Dallas, Texas based Merit Energy Company. Merit employs more than 650 people with operations in thirteen states, the Gulf of Mexico and Canada with net operated production in excess of 99,500 BOE/d and proved reserves of 418 MMBOE.
- **Galleon Energy**, a mid-sized oil and natural gas explorer and producer operating in Western Canada. Galleon has the largest contiguous land block ever assembled on Alberta’s prolific Peace River Arch.
- **Peyto Energy Trust**, a Calgary-based energy company, is an explorer and producer of unconventional tight gas assets in Alberta’s Deep Basin and is known for building its own high quality, sweet natural gas assets that exhibit long reserve life, low operating costs, and high revenue per BOE.
- **Terra Energy**, a junior exploration and production company in Western Canada. Terra’s operations are concentrated primarily in northeastern British Columbia and the Peace River Arch region of Alberta.
- **Angle Energy**, a public oil and gas exploration and development company incorporated in 2004 and based in Calgary, Alberta. Angle’s production emphasis is in West Central Alberta.

Detection Technologies is the developer of “Analysis”, the world’s leading compressor optimization and fleet management program. For more information on Detection, please call 800.780.9798, or visit their website at [www.detection.com](http://www.detection.com).
